## The Value in the TuffDock System.

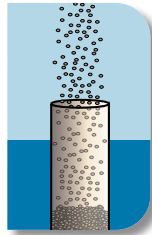

- TuffDock Systems values the ability to offer a superior dock system to waterfront property owners, marinas, marine contractors and engineers.
- We believe that TuffDock System's total less cost of ownership is far superior, because it outlasts wood timbers, steel and concrete.
- As a company we are dedicated to protecting the environment with materials that are not harmful to wildlife or human life.
- We are committed to our boat owners and dedicate our systems to not harming boats or their surfaces.
- We take on the challenges of working closely with marine contractors to assure we make their jobs easier and less intrusive to the environment.
- We pride ourselves on providing a complete piling and accessory system that will keep docks not only neat and beautiful but longer lasting than chemically treated or rotting timbers.
- We hold ourselves accountable to our customers by providing a 20-year limited warranty.

### Durable:

- Engineered and manufactured to be rugged and weather resistant.
- Crafted to remain straight and round for many years; will not crack or deteriorate.

*May be used as protective sleeve around existing deteriorating timber pilings.*

*Filling with concrete or sand adds more strength and rigidity.*

### Environmentally Friendly:

- No need to treat with pesticides (CCA) like wood.
- Safe to use in sensitive areas such as protected wetlands and sea grass areas.
- No need to wrap with polyethylene sheets.

### Beautiful:

- Coordinated dock accessories of same durable PVC material.
- Integrated solutions for lighting and fire extinguisher storage.
- Keeps docks clean and neat.

### Installation of TuffDock Systems Pilings:

- Designed for easy installation with jetting, drop hammer and vibratory methods.
- Only 1/3 the weight of wood timber pilings and are easier to deliver and install.
- No back breaking heavy loads to move around the project site.
- Significantly reduces truck and barge work in sensitive areas.
- Structural framing attached in less time; easier to drill.

### Integrated Lighting Systems:

- Dual-purpose lights shine down on deck surface while providing accent lighting.
- Low-wattage fluorescent bulbs for energy savings.
- Integrated into TuffDock Systems pilings—no ugly wiring or exposed conduit.
- 20, 30 & 50 amp electrical outlets available.

### Water Hose Storage:

- Stainless steel hose hanger will accommodate up to a 75' hose, sold separately.
- Pre-plumbed with marine-grade hose bib.
- Keeps docks shipshape and uncluttered.
- No loose hoses to trip over.
- Durable PVC piling construction.
- Rugged, weather and corrosion resistant.

### Integrated Fire Extinguisher Storage:

- Protects your investment with this fire safety solution.
- Fire extinguisher stays safe and dry until needed.
- Easily visible on the dock with the word "Fire" displayed and illuminated.
- Accommodates up to ten-pound extinguisher, sold separately.

### TuffDock Systems Pilings:

- Complement the beauty of your waterfront property.
- Designed with boaters in mind; will not damage boat's rub rails like wood.
- Constructed of special PVC material, rugged, weather resistant, corrosion resistant.
- Unlike wood pilings it is impervious to marine borer attacks 20-year limited warranty.

### Piling Caps:

- Crafted of strong, weather-resistant PVC material as the pilings.
- Adds colors and beauty to your dock and marina.
- Engineered to fit snug onto pilings.
- Available in white, gray, tan or adobe to coordinate with piling colors:

*white*

*gray*

*tan*

*adobe*
